Drone Technology

Utility Boilers

Stacks

Pulp and Paper

Oil and Gas

Power Line

Confined Spaces

Unmanned Aerial Systems (UAS): Drone inspections are a safe and efficient alternative to the manual inspection process by eliminating the risk of placing human resources in elevated equipment and confined spaces. Drones provide a unique high-quality video and photo perspective at an affordable price. They allow for quick inspection of hard to access areas and can maximize up-time and reduce risk.

PERFORM INSPECTIONS

**WITH OPTIONS TO
OWN, LEASE
AND/OR TRAIN
YOUR PILOTS**

We are more than a typical Drone company, we are a full service EHS and Security company, with Training as an additional strength.
